Moncton, NB | 506-343-4486 | dominhtri055@gmail.com | [linkedin.com/in/trido2908](https://www.linkedin.com/in/trido2908) | github.com/dominhtri055

Featured Projects: [ShopPilot Mobile](#) | [ScheduleBooker Live App](#) | [WhatsApp AI Chatbot](#)

PROFESSIONAL SUMMARY

Software Development graduate from NBCC with hands-on experience building mobile-first and full-stack applications using React Native, Expo, TypeScript, Python, Flask, JavaScript, React/Next.js, REST APIs, MongoDB, MySQL, SQLite, PostgreSQL, C#, ASP.NET Core MVC, and Git. Portfolio includes ShopPilot Mobile, a React Native commerce dashboard inspired by Shopify-style merchant workflows, and ScheduleBooker, a team-built Flask appointment-booking platform with customer, guest, admin, repository/service, API, and deployment features. Strong interest in mobile engineering, full-stack product development, clean architecture, user-focused workflows, debugging, and scalable commerce applications.

TECHNICAL SKILLS

Mobile / Front-End: React Native, Expo, Expo Router, TypeScript, React Hooks, AsyncStorage, React/Next.js, HTML5, CSS3, responsive UI

Back-End / APIs: Python, Flask, Node.js basics, Express basics, REST APIs, JSON, webhooks, app factory pattern, blueprints, API routes

Database / Data: SQLite, PostgreSQL, MongoDB, Mongoose, MySQL, SQL Server, repository pattern, schema design fundamentals

Testing / Quality: pytest, ruff, TypeScript checks, debugging, error handling, linting, technical documentation

Tools / Workflow: Git, GitHub, VS Code, Visual Studio, Expo Go, Render deployment, Agile/Scrum, team collaboration

SELECTED PROJECTS

ShopPilot Mobile - React Native Commerce Dashboard | *React Native, Expo, TypeScript, Expo Router, AsyncStorage*

Links: [GitHub](#)

- Built a React Native merchant dashboard inspired by Shopify-style commerce workflows for managing products, inventory, orders, and revenue insights.
- Implemented persistent demo authentication, route redirection, product search/filtering, low-stock filtering, product detail pages, inventory updates, and publishing status changes.
- Built order management workflows including fulfillment filters, order detail pages, status transitions, refund actions, weekly revenue visualization, and inventory risk monitoring.
- Structured the app with typed domain models, reusable UI components, utility functions, mock API services, loading states, empty states, and error handling.

ScheduleBooker - Team Full-Stack Appointment Booking Platform | *Python, Flask, SQLite, PostgreSQL, HTML, CSS,*

JavaScript, pytest, ruff

Links: [Live App](#)

- Collaborated on a Flask barbershop appointment-booking app with public booking flow, guest lookup/cancellation, customer appointments, and an admin panel.
- Contributed to a cleaner backend structure using an app factory pattern, Flask blueprints, reusable service/repository layers, SQLite local support, and PostgreSQL deployment support.
- Supported booking rules such as shop hours, 30-minute time slots, capacity checks, future-only public bookings, and cancellation restrictions.
- Helped document and structure real API v1 endpoints for health checks, services, barbers, and availability so the backend can support future mobile clients.

WhatsApp AI Chatbot - Full-Stack Messaging Dashboard | *Next.js, TypeScript, MongoDB, Mongoose, OpenAI API, WhatsApp Cloud API*

Links: [GitHub](#)

- Built a customer-support chatbot prototype that receives WhatsApp messages through webhooks, stores conversation history, generates AI replies, and sends responses back through the WhatsApp Cloud API.
- Implemented MongoDB/Mongoose models for users, conversations, and messages and created an admin-style dashboard for reviewing conversation threads and managing tone behavior.
- Practiced API integration, environment configuration, webhook debugging, async request handling, error handling, and documentation for local setup and deployment direction.

EXPERIENCE

Software Development Intern - Beetech Solution LTD. | *Apr 2026 - Jun 2026*

- Contributed to web application features in a professional internship environment, including front-end updates, CRUD-style workflows, bug fixing, and feature testing.
- Worked on a rating feature and started a new CRUD website project, strengthening practical experience with real project structure and backend logic.
- Practiced progress reporting, feedback-based iteration, debugging, documentation, and dependable task delivery under supervisor guidance.
- Received positive feedback for dependability, communication, proactive attitude, and ability to follow instructions carefully.

EDUCATION

Diploma - Information Technology: Software Development

New Brunswick Community College, Moncton, NB | Graduated 2026

Relevant coursework: Mobile Development, Web Development, Object-Oriented Programming, Database Management, Software Engineering, Front-End Development, Back-End Development, Agile/Scrum.

RELEVANT STRENGTHS

- Mobile engineering mindset: builds user-focused screens, reusable components, typed models, and maintainable navigation flows.
- Full-stack product mindset: understands public/customer/admin workflows, API design, database-backed features, and deployment constraints.
- Commerce and booking workflow experience: familiar with product catalogs, inventory workflows, order fulfillment, appointment scheduling, availability rules, and dashboard UX.
- Problem solving: reads errors carefully, traces root causes, tests fixes, documents setup steps, and breaks complex issues into manageable tasks.
- Collaboration: comfortable using Git/GitHub, reporting progress, receiving feedback, and working in team project environments.

ADDITIONAL PUBLIC GITHUB PROJECTS

COMP9784 Final Project - Express API Backend | *JavaScript, Node.js, Express, MongoDB*

Links: [GitHub](#)

- Public backend API project showing Node/Express project structure, environment configuration, source organization, and database-backed API development practice.

Front-End UI Projects - Profolio, Candystore, Calculator, Login Page | *HTML, CSS, JavaScript*

Links: [GitHub Profile](#)

- Additional public repositories demonstrating responsive layout fundamentals, static UI development, styling, DOM interaction, and early front-end practice.
