Featured Projects: ShopPilot | ScheduleBooker | WhatsApp AI

## SUMMARY

Software Development graduate from NBCC with hands-on experience building mobile-first and full-stack applications using React Native, Expo, TypeScript, Python, Flask, JavaScript, React/Next.js, REST APIs, MongoDB, SQL, C#, ASP.NET Core MVC, and Git. I am seeking entry-level developer roles where I can build clean, user-focused applications and solve real business problems.

## SKILLS

Programming Languages: TypeScript, JavaScript, Python, C#, SQL, HTML5, CSS3  
Frameworks: React Native, Expo, React, Next.js, Flask, ASP.NET Core MVC, REST APIs  
Databases: SQLite, PostgreSQL, MongoDB, Mongoose, MySQL, SQL Server  
Tools: Git, GitHub, VS Code, Visual Studio, Expo Go, Render, pytest, ruff  
Soft skills: Debugging, documentation, collaboration, communication, problem solving

## EXPERIENCE

### Software Development Intern Beetech Solution LTD.

Apr 2026 - Jun 2026

- Developed and tested web application features, including CRUD-style workflows, front-end updates, backend logic, bug fixing, and feature testing.
- Completed a rating feature and began a new CRUD website project, gaining practical experience with real project structure and backend workflow.
- Reported progress, documented work, debugged issues, and iterated on supervisor feedback in a professional internship environment.
- Received positive feedback for dependability, communication, proactive attitude, and ability to follow instructions carefully.

## PROJECTS

### ShopPilot Mobile - React Native Commerce Dashboard

2026

*React Native | Expo | TypeScript | Expo Router | AsyncStorage*

- Built a mobile commerce dashboard for managing products, inventory, orders, and revenue insights.
- Implemented demo authentication, route redirects, search/filtering, product details, inventory updates, publishing status changes, and order status flows.
- Structured the app with typed domain models, reusable UI components, mock API services, loading states, empty states, and error handling.

### ScheduleBooker - Full-Stack Appointment Booking Platform

2026

*Python | Flask | SQLite | PostgreSQL | HTML | CSS | JavaScript | pytest | ruff*

- Collaborated on a barbershop appointment-booking app with public booking, guest lookup/cancellation, customer appointments, and an admin panel.
- Supported app factory structure, Flask blueprints, service/repository layers, booking rules, PostgreSQL deployment support, and API v1 endpoints.

### WhatsApp AI Chatbot - Full-Stack Messaging Dashboard

2026

*Next.js | TypeScript | MongoDB | Mongoose | OpenAI API | WhatsApp Cloud API*

- Built a chatbot prototype that receives WhatsApp webhook messages, stores conversation history, generates AI replies, and sends responses back through the WhatsApp Cloud API.
- Created MongoDB/Mongoose models and an admin-style dashboard for reviewing conversation threads and managing tone behavior.

## EDUCATION

Diploma - Information Technology: Software Development  
New Brunswick Community College, Moncton, NB

Graduated 2026
