PROFESSIONAL SUMMARY

I am a recent Information Technology: Software Development graduate from New Brunswick Community College with hands-on experience building web, mobile, and full-stack applications through a software development internship and personal projects. I enjoy solving technical problems, debugging, and turning ideas into practical software. I am detail-oriented, adaptable, and comfortable collaborating with others, learning new tools quickly, and taking ownership of tasks from development through testing and refinement.

EDUCATION

New Brunswick Community College, Diploma - Information Technology: Software Development 2024 - 2026
Moncton, New Brunswick | Graduated July 2026

- Program focused on web and full-stack development, object-oriented programming, backend development, REST APIs, relational and NoSQL databases, mobile application development, software engineering, testing, version control, and Agile/Scrum practices.

EXPERIENCE

Software Development Intern - Beetech Solution LTD. Apr 2026 - Jun 2026

- Developed and tested web features across CRUD workflows, front-end updates, backend logic, bug fixing, and feature validation.
- Completed a rating feature and contributed to a new CRUD web application, strengthening practical experience with application structure and data workflows.
- Documented progress, debugged issues, communicated blockers, and iterated on supervisor feedback in a collaborative development environment.

PROJECT

ShopPilot Commerce Platform - Merchant App + Storefront [View Project](#)

React Native | Expo | Next.js | TypeScript | Supabase | PostgreSQL

- Built a cross-platform merchant platform for **3 platforms** - Android, iOS, and Web - covering **4 operational areas** including products, inventory, orders, and store settings, with authentication, refunds, file storage, and Row Level Security.
- Integrated **5 analytics event types**, a **5-stage fulfillment workflow**, and **7 core Supabase resources** including **2 protected storage buckets** for product images and store logos.

License Plate Assignment API [View Project](#)

Node.js | Express | TypeScript | MongoDB | Mongoose

- Built **4 REST endpoints** to assign, revoke, and verify Ontario-style licence plates with **17-character VIN** validation and normalized licence-plate input.
- Protected all **4 API endpoints** with API-key middleware and added **4 request/security controls** - Helmet, CORS, compression, and rate limiting - plus duplicate-assignment safeguards and structured error handling.

ScheduleBooker - Full-Stack Appointment Booking Platform [View Project](#)

Python | Flask | PostgreSQL | SQLite | HTML | CSS | JavaScript

- Implemented **7 core workflow areas** spanning booking, guest lookup, cancellation, customer appointments, administration, service/barber management, and income reporting.
- Supported **2 database engines** - PostgreSQL and SQLite - with Flask blueprints, service/repository separation, booking rules, API endpoints, responsive UI, testing, and production deployment.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, Kotlin, C#, SQL, HTML5, CSS3

Front-End & Mobile: React, Next.js, React Native, Expo, Tailwind CSS, responsive design

Back-End & APIs: Node.js, Express, Flask, Spring Boot, REST APIs

Databases: PostgreSQL, MongoDB, Mongoose, MySQL, SQLite, SQL Server

Tools & Platforms: Git, GitHub, Docker, Postman, Figma, VS Code, Visual Studio, Android Studio, Render, Vercel

Transferable Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management, Attention to Detail
